

Improve your production capabilities

Visual maintenance management (TPM)

VALUE AND BENEFITS

- The autonomous maintenance (pillar of the TPM) is a lean initiative used in factories to:
 - Control spending and defects
 - Reduce downtime and waste
 - Improve production capabilities
- Package which allows you to be autonomous thanks to 3 maintenance basics: CIL, LOTO and OPL

DESCRIPTION

- Scope of supply: LOTO and CIL stickers, CIL maps and OPL plastic coated sheets
- CIL (Cleaning, Inspection, Lubrication) stickers and Standard operating procedures integrated in the maintenance documentation
- LOTO (“Lockout Tag out”) on critical points of the machine. Ensures that dangerous machines are properly shut off and not started up again prior to the completion of maintenance or servicing work
- OPL* (One Page Lesson): simple operational tool used to educate operators in an organization and improve product or service quality
(*) **Not available on Universal blowers**
- Intervention of 1 FSE to put the stickers and train level 1 operators

Value: Efficiency

Equipment: Matrix and Universal* blowers, Matrix fillers and labelers
