

1054 – Dual Speed drum motors evolution

Original dual speed drum motors replaced by latest range of single speed drum motors on the preform feeder

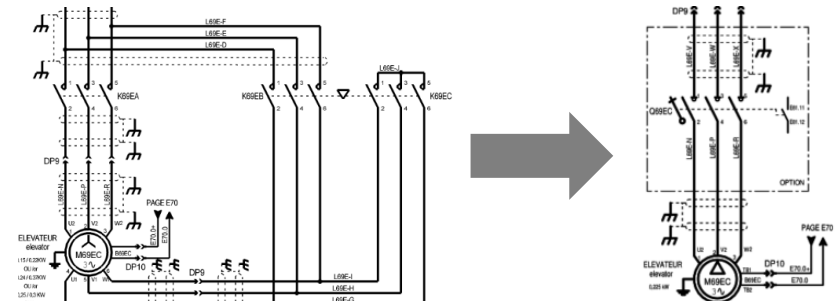

VALUE AND BENEFITS

- **Secure your production in case of failure**
 - Solve Spare Parts unavailability on original range.
 - Improved reliability
 - Single speed = simpler design

DESCRIPTION

- Replace the original drum motors by the improved range of drum motors provided by the original supplier (same brand)
- Important, take in consideration that this upgrade requires automation modification. HMI and PLC software must match the new hardware configuration.
- Example of possible kit (may vary, according with equipment configuration):
 - a. Drum motor
 - b. Connector + wires + power socket
 - c. Eprom
 - d. New parameters for the speed variator

Value: Obsolescence

Equipment: Universal preform feeder

Catalogue code: 1054
