

Secure bottle quality and weight

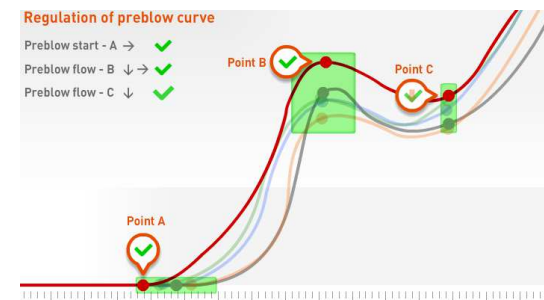

Intelliblower

VALUE AND BENEFITS

- Intelliblower option ensures optimum accuracy of the blowing process for each bottle by:
 - The automatic regulation of the overall preblow pressure
 - The automatic regulation of the start of preblowing phase per station
 - The automatic regulation of the preblow flowrate per station
- Reduce the variation of the bottle weight per zone

DESCRIPTION

- Pack elements:
 - Stepping motors to drive preblow flowrate limiters
 - Power and regulation cables.
 - Input/output modules
 - PLC program.

Value: Product quality
Equipment: blowers Matrix
Catalogue code: 2001
