

Reduce maintenance expenses on the spindle chain

Bearing spindle chain

VALUE AND BENEFITS

- Extend the life span from 12,000 hours to 24,000 hours
- Increase the machine availability for less maintenance
- Decrease the maintenance cost: Simple kit

	Maintenance operation	
	Standard spindle chain	Full bearing spindle chain
6,000 hours	Refurbishment	No maintenance
12,000 hours	Replacement	No maintenance
18,000 hours	Refurbishment	No maintenance
24,000 hours	Replacement	Replacement

Value: Maintenance, Cost Optimisation, Efficiency

Equipment: MATRIX blowers

Catalogue code: 2004

DESCRIPTION

- V bearing and Hepco guide = better alignment
- H made of aluminium
- Links in stainless steel
- Spring diameter: 1.8mm
- Shaft diameter: 14mm
- Pinion: case hardened with a nitrogen treatment
