

# Significant decrease in changeover time

## Bottle switch system

### VALUE AND BENEFITS

- Specific pneumatic carriages so that the operator does not have to manually connect and disconnect the mold base hoses
- Cost optimisation: Less downtime means better TCO - Less than 40 seconds for one mold change-over
- Safety: Semi-automated system with fewer manual operations
- Simplicity and ergonomics: Tool-free operations and easy access to parts

### DESCRIPTION

- This option includes:
  - the latched shell support which permits the installation and removal of the mold bodies without tools. The half-mold is locked/unlocked by two sets of hooks controlled by 7 BAR cylinders
  - One 7 BAR supply port for automatic disconnection / connection of the base mold and the shells

Value: Flexibility

Equipment: blowers Matrix XS / M / L+
