

# Higer efficiency in feeding your blower

## Automated preform loading system in the hopper for 1 or 2 octabins

### VALUE AND BENEFITS

- Continuous preform feeding without production's interruption
- Top bottles' hygiene/cleanliness thanks to moveable cover (optional)
- Highest operators' safety standards granted through safety zone (light barriers - optional)

Value: Efficiency

Equipment: Blower S1 - S2 - Universal - Matrix

Catalogue code: 2037

### DESCRIPTION

- Mechanical device including a moving bin to transfer preforms from the octabin to the hopper
- moveable cover and a pivoting flap to prevent preforms from falling parts/dust
- Quick access without opening the doors: safety zone during dumping phases created with light barriers (optional)

Standard configuration :

- When Octabin is positioned, and doors closed: operator to validate with push button on duper electrical cab
- Automatic dumping depending on hopper low level sensor
- Automatic hopper cover opening (if any)
- Automated preform loading system in the hopper for 2 octabins
