

Keep your necks at the right temperature

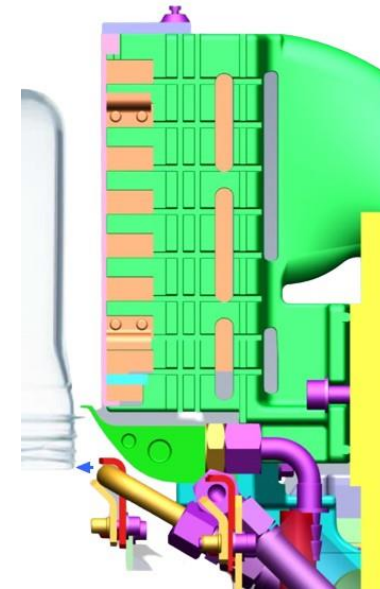

Neck Finish Air Cooling - 2044

VALUE AND BENEFITS

- Maintain neck finish at a suitable temperature
- Prevent neck finish deformation during blowing
- Recommended for r-Pet production

DESCRIPTION

- A vortex tube produces refrigerated air from high pressure air skid
- Low temperature air is blown on the neck finishes through perforated tubes, with adjustable positioning against the water cooling shields, right below the oven modules

Value: Product Quality
Equipment: Blowers Universal and Matrix
Catalogue code: 2044
