

Less air to remove dust

2085 Air consumption reduction on dedusting module

VALUE AND BENEFITS

- Reduce the air consumption of the dedusting module :
 - In standby mode, 60% less air consumption.
 - Savings as well in production mode.
- At 0.8 bar of dedusting pressure, measured around 40 Nm³/h savings.

DESCRIPTION

- New design to improve the air tightness in the sleeves.
- New assembly principle
