

Secure your final product quality by checking bottle integrity

Bottle pressure control on S2

VALUE AND BENEFITS

- More production time by reducing line stoppages
- Detection system performances close to vision systems ones for a more affordable pricing
- Easy to use and very reliable

Value: Product quality
Equipment: S2 blowers
Catalogue code: 983

DESCRIPTION

- By doing the pression check in two points during blowing phase, the system can identify and eject bottles with following defaults:
 - Micro-holes
 - Bad shape of the bottle bottom (unfinished blowing process)
- All necessary pressure sensors are already installed on the blower
- 100% software application
