## Increase service life by 50%

## Long-life spindle chain (snap-head technology)

## **VALUE AND BENEFITS**

- This new solution significantly reduces chain elongation and increases its service life by 50%
- Better stability of preform conveying over time (precision in loading, unloading and transfer preform at oven outfeed)
- Less maintenance thanks to elimination of ball-joint lubrication.
- Dust-proof bushes

## **DESCRIPTION**

- Average service life of 18,000 hours
- Better resistance to elongation, for more effective synchronization during preform transfer
- Optimized link piece profile to eliminate friction
- Polyacetal ring for improved contact with the tensioner wheel
- Installation is possible on SBO 4, SBO 6, SBO 10, SBO 16, and SBO 24/26
- Some additional parts such as the return ramps will have to be replaced
- Prevents wear of self-lubricated rings
- Maintenance plan and kit available
- Quick Change and non-Quick Change (screw-on end-piece) versions available

Value: cost optimization, efficiency, obsolescence

Equipment: Series 1 blowers

Catalog code: 984
