

Higher reliability and components life

AA33 – New Pads and Regulation System

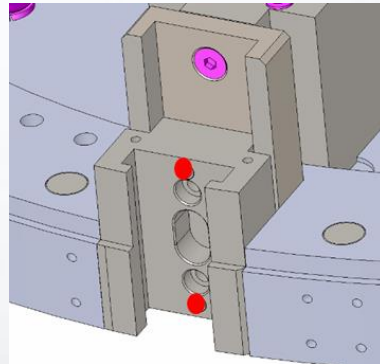

VALUE AND BENEFITS

- Maintenance costs reduction (TCO);
 - Highest performance repeatability
 - Increased reliability and components' service life;
 - Easy settings and fine tuning (2D pads adjustment)
 - Reset of the whole station with the same reference
-
- Current system maintenance : 680 min/year
 - New system maintenance : **480 min/year**

Polyurethane Pad (Aluminium)

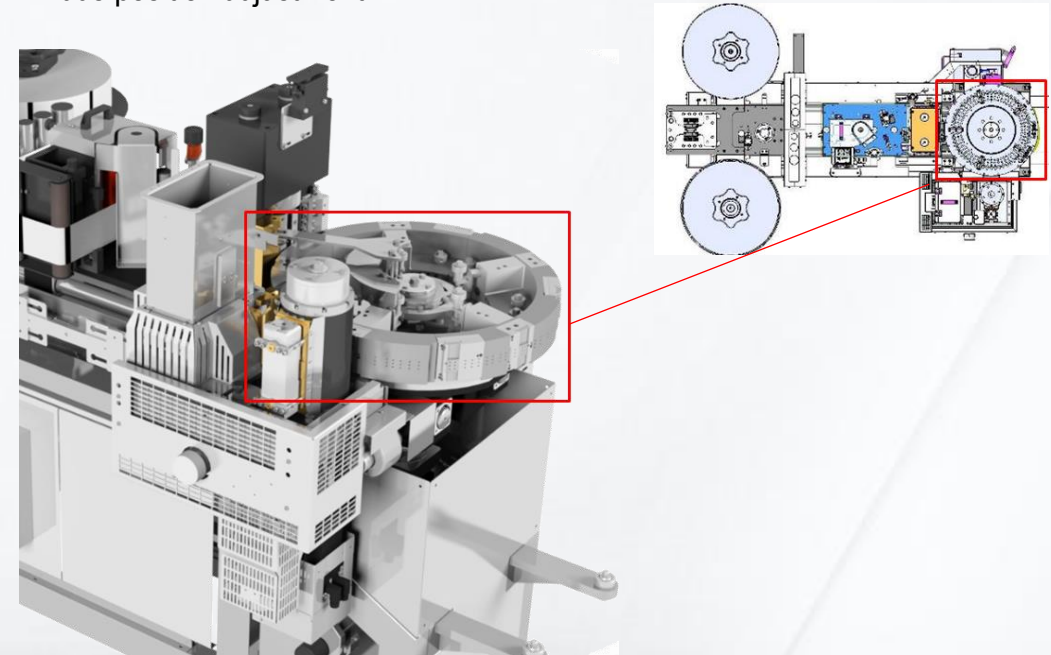

Polyurethane

DESCRIPTION

- New Drum pads, made of Aluminum with Polyurethane insert, replacing the former model made of Peek and foam
- New pad support with Polyurethane gasket (not needed for Roll4 Evo)
- Pads position adjustment in 2D

Value: Cost Optimization, Efficiency
Equipment: Labeller EvoDECO Roll-Fed, SSC, Roll4 Evo
Catalogue code: AA33
