

Right lubricant at the right time

Vacuum Distribution Plate Automatic Lubrication

VALUE AND BENEFITS

- Reduced frequency and easier maintenance routine
- Less maintenance downtime and related costs
- Increased machine availability for production

Value: Cost Optimization, Efficiency
Equipment: Rollquattro, Rollquattro Evo, Matrix
Catalogue code: AA29

DESCRIPTION

- New Grease feed pump for the lubrication will be located between the vacuum distribution plate and the vacuum drum.
- Using a sensor, the system detects the number of cycles and delivers the defined amount of grease on time
