

Increase the machine efficiency

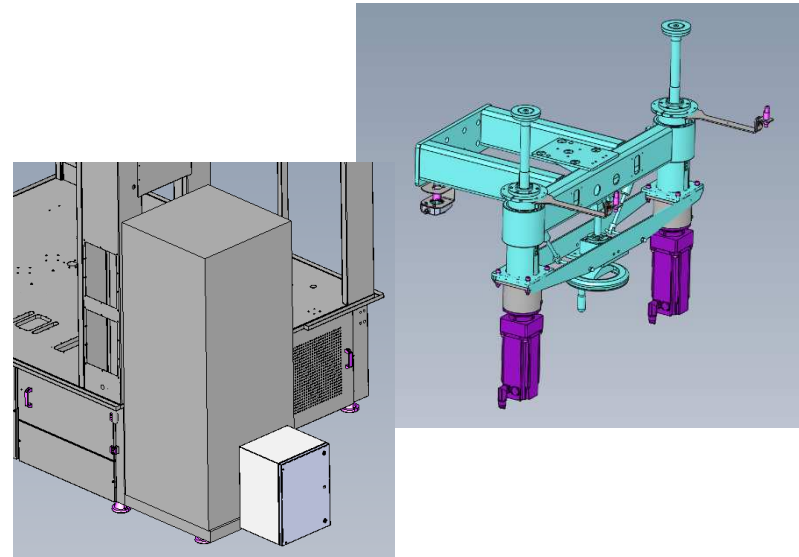

Motorized reel support

Value and benefits

- Increase machine efficiency by eliminating the label stretch
- Reduce maintenance cost
- Possibility to upgrade the splicing speed with HS splicer option
- Increase machine efficiency when the reel is running at low diameter

Description

- Mechanical brake system replaced with brushless servomotors
- New end reel sensor
- Stand alone electrical cabinet with B&R solution

Value: Efficiency, Cost optimisation

Equipment: Rollquattro evolution

Catalog code: AX25
