

Optimal Changeover

Intelligent automatized adjustment system

VALUE AND BENEFITS

Productivity:

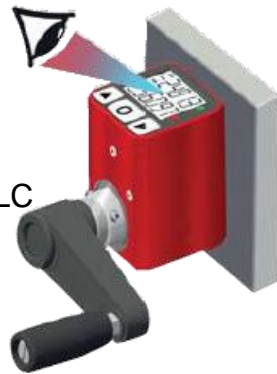

- Time saving during changeover operation and at new format starting
- Optimized adjustment every changeover

Quality:

- Adjustment repeatability
- Constant check that all devices are in the target position

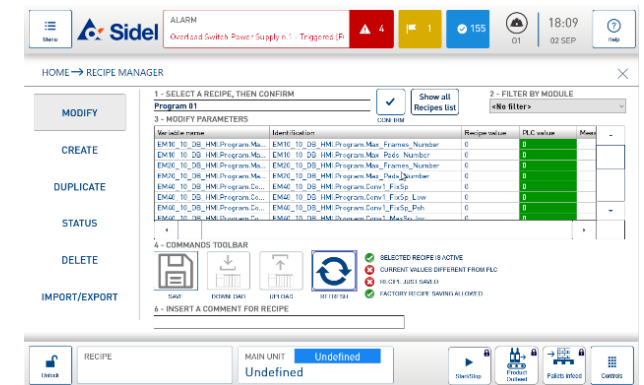

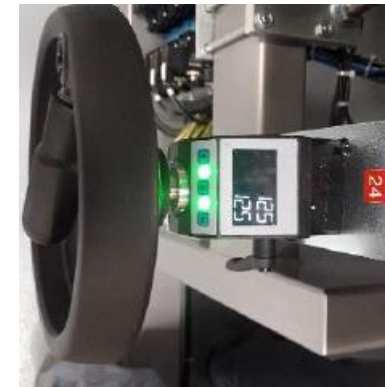

Ergonomics:

- Immediate visual control of correct (green) or wrong (red) adjustment
- Optimal adjustment values recorded in the PLC and displayed in the HMI

DESCRIPTION

- Compact and robust case made of anodized aluminum (IP65)
- 2 LEDs, 1 green and 1 red, guide the operator until the correct position
- RS485 interface allows communication with the PLC. Profinet and EtherNet/IP
- All parameters are freely programmable, displayed and secured on the HMI

Value: Cost optimization, Flexibility

Equipment: All packing machines, after 2010

Catalogue code: CLC_056
