

# MOTORIZED LAYER GUIDES

MOTORIZED COMPACTION GUIDES FOR OPTIMAL LAYER FORMATION, MINIMUM MAINTENANCE, IMMEDIATE FORMAT CHANGE OVER.

## Applicability

Available on our models PAL KOMBI, PAL LINEAR.

See serial numbers below in green for applicable models

Subject to detailed feasibility study for your own equipment  
Contact your Service Account Manager for additional info

## Your advantages

### Efficiency

- Immediate format change.

### Maintenance

- No mechanical transmission thanks to the belts, that requires less maintenance.

### Product Quality

- Better compaction function.

## BEFORE

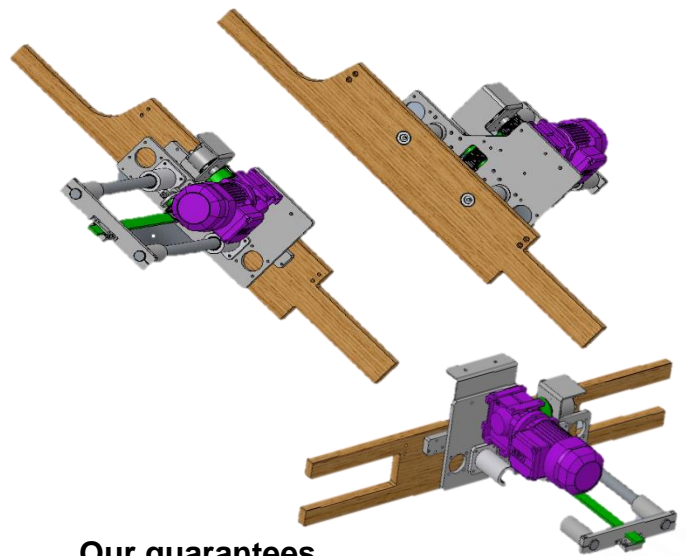

## Technical description

In the old configuration, the layer-guides quadrature is pneumatically activated requiring manual adjustment by the operator for each format change over.

In the new configuration, there are motorized guides on all three sides of the lifter and the encoder for positioning. No manual/mechanical adjustments are necessary to change the format/layer thanks to the automatic function. Less maintenance needed due to the belt transmission instead of the mechanical one.

## AFTER

## Our guarantees

- Parts: 12 months
- Compliance with regulatory standards in force
- Constant support ensured
- Preserve the integrity of the machine
- Efficient After-sales service, spare parts, technical assistance
- Installation by skilled personnel

## Conversion/delivery time & misc

- Level of complexity: MEDIUM
- Downtime (days): 2
- Delivery time (weeks): 9
- Need for training: N
