

## KEY FIGURES

### Budget price:

60K (installation included)

### Main benefit

Efficiency

### Lead time:

16 weeks

### Installation time:

3 days

### Machine downtime:

1 day

\*These data are approximate and not definitive, depending on your machine configuration.

### Can be combined with:

- EOL053 Reinforced sucker support

### Machine application :

- Palletizer

# EOL055 Independent base layer loading station

Efficiency

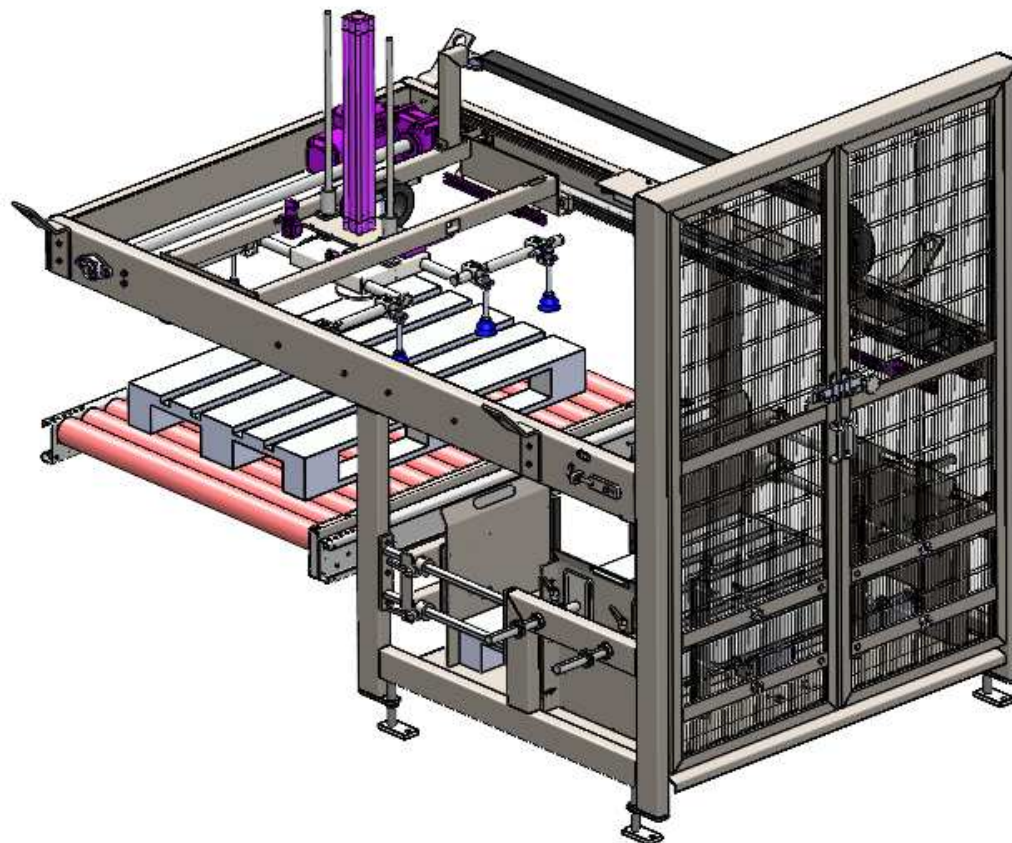

**Boost Your Efficiency: Accelerate Your Palletiser and Maximize Production!**

## DESCRIPTION

- The new additional module is an independent device to put the pad on empty pallet
- The new module include interlayer pad storage
- Suitable for pallets 1200x1000, 1200x800 and half pallet

## BENEFITS

- **Efficiency:** the new additional module saves time by automating and parallelizing the pad placement, thereby enhancing the overall efficiency of the palletization process.
- The additional pad placing module places the pad on the empty pallet, while the main pad placer only needs to place the pads between the layers. In this way, the palletization process is not interrupted to allow the main pad placer to also place the pad on the empty pallet.
