

Hygiene and simplicity

HS045 – Lubricated Airless Drive

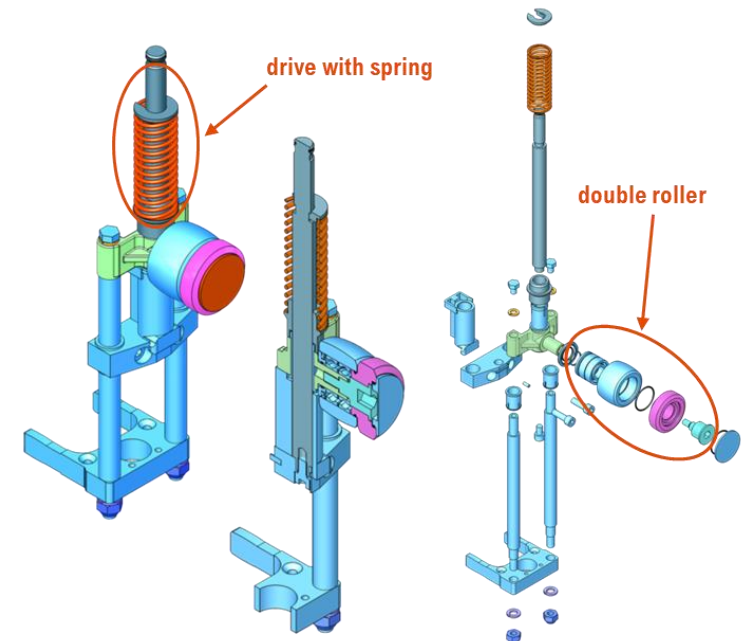

VALUE AND BENEFITS

- No more compressed air;
- No air lubrication system;
- Less shutdowns for maintenance
 - every 4500 hours vs 2500 / 3000 hours
- Less complex maintenance (no need to replace filters, seals...);
- Increased reliability

DESCRIPTION

- Compressed air drive is replaced by a mechanical drive with spring
- valve trolley is modified, removing all the seals on the sliding shaft and then inserting the new shaft and drive spring
- No more lubrication oil to the filling carousel

Value: Cost Optimization, Efficiency
Equipment: Starcans RSC
Catalogue code: HS045
