

Improve the reliability and product safety

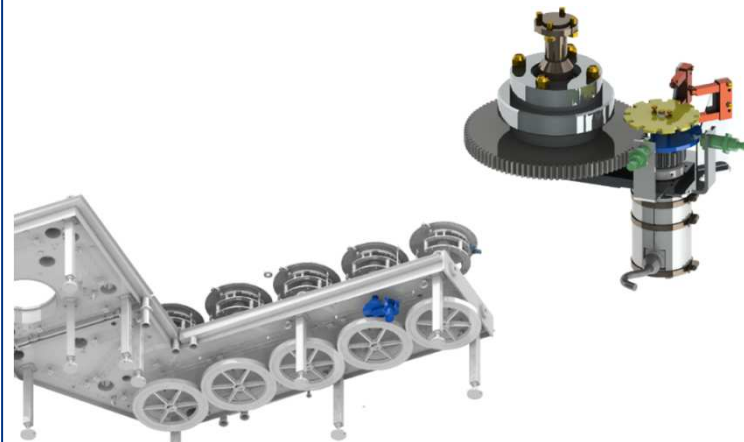

New Phoenix Safe Speed system

VALUE AND BENEFITS

- More operator safety with respect to previous system
- High precision and handling and machine stop control
- Low maintenance (conditional: only in malfunction cases)
- Increase reliability
- Ease of installation

DESCRIPTION

- In the previous solution speed and position were read by the software
- The new solution with the Phoenix system allows a greater safety, speed and position are read by an encoder and mechanical hardware transmits the signal without errors (example opening doors during downtime machine)
- Safety solution for filler control in production and CIP

Value: Flexibility

Equipment: Fillers RAA, HS REP, RAC, HS REV, LP REE, FM C RVE, FM LT RVL

Catalogue code: HS116
