

# Reduce maintenance costs and anticipate spare parts shortage

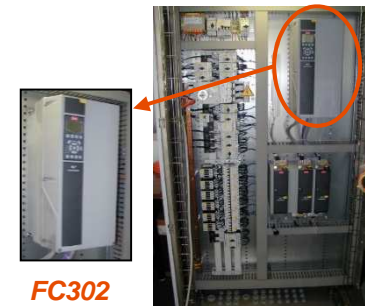

## New Frequency Inverter and Cleverax Card

### VALUE AND BENEFITS

- Added profibus control (compared to the versions in which it was missing) to the inverter;
- Energy and cost savings;
- Safety solution with newer component available in the market;
- Increased efficiency.

### DESCRIPTION

- In the current system, in some machines the synchronising system consists of the *CleverAx* card separated from the inverter, in some other ones there is the old *Danfoss* inverter with the *SyncPos* card embedded.
- The new system consists of the new *Danfoss FC302* inverter with the new *MCO305* card embedded.

Value: Maintenance, Obsolescence

Equipment: All the COMBI Fillers with electrical management of the filler-blower synchronism

Catalogue code: HS122
