

Reliable and long lasting grippers

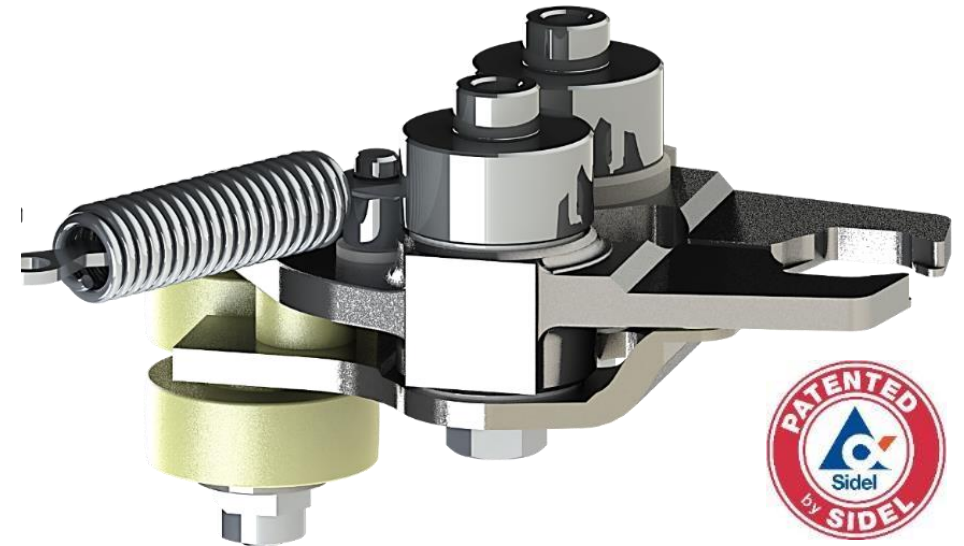

New “C” Grippers

VALUE AND BENEFITS

- First maintenance not before 12000h, thanks to
 - Spring lifetime increased
 - Reduction of bushings wear and arms backlash
 - Gripper components' lifetime increased
- Complete bottle control during transfer thanks to
 - Grippers Bending reduction (-83%)
 - new and improved grippers' profile
- Increased overall hygiene
 - not abrasive powder in the machine - FDA material certified

DESCRIPTION

- New roller in same radial positioning, reducing the load cam impact
- New Spring design in same positioning
- New Stopper design
 - same material as rollers
 - New positioning to reduce the impact load and the axial pitch
- New bushing and shaft design and material;

Value: Maintenance/Efficiency/Product Quality

Equipment: Matrix SF100 RMC / SF300 RMB; Eurotronica FM-C RVE / RVU; Eurotronica FM-S RFI / FM-LT RVL; Veloce H RVI
