

Obsolescence

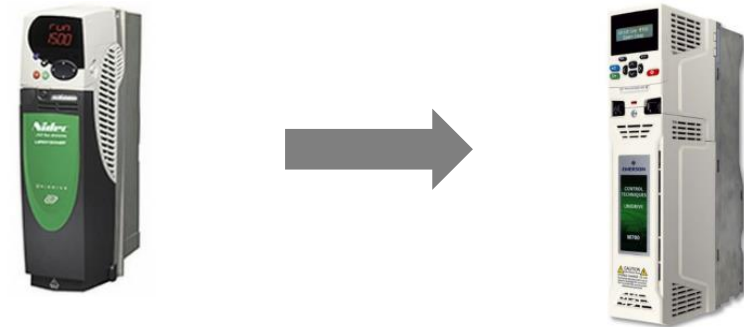

Replacement of Inverters Leroy Somer UMV or Unidrive SP by Unidrive type M-700

VALUE AND BENEFITS

- The Unidrive M-700 provides high-performance motor control and ultimate control flexibility for users.
- The Unidrive M-700 is the direct upgrade path or UMV and Unidrive SP.
- Flexible universal port coder.
- More intuitive keyboard, multi-languages.
- Simplify of the electric wiring made from now on via network Ethernet (it is not necessary anymore to make a coder copy, there are no longer cables).

DESCRIPTION

- Ethernet integration for a precision of optimal synchronization.
- Ethernet Switch dual ports as standard to simplify the connectivity.
- A Smartcard is adapted to the drive to save the adjustments of axle in case of drive replacement or to start a new motor.

Value: Obsolescence
