

M-700 LEROY SOMER DRIVE

Applicability

Shrink wrappers TS – TSI- TW

Your advantages

The Unidrive M-700 provides high-performance motor control and ultimate control flexibility for users.

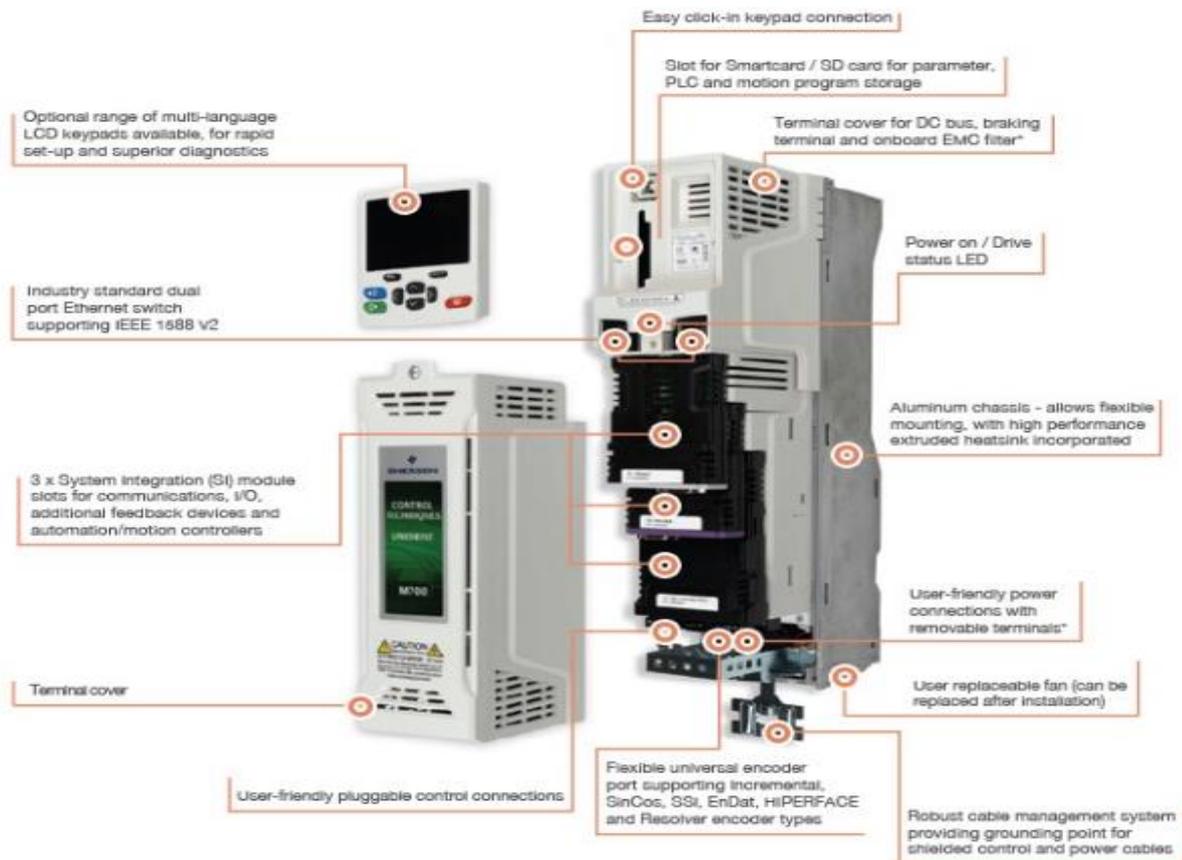

The Unidrive M-700 is the direct upgrade path or UMV and Unidrive SP.

Flexible universal port coder.

More intuitive keyboard, multi-languages.

Simplify of the electric wiring made from now on via network Ethernet (it is not necessary anymore to make a coder copy, there are no longer cables).

M-700 LEROY SOMER DRIVE

Technical description

- Ethernet integration for a precision of optimal synchronization.
- Ethernet Switch dual ports as standard to simplify the connectivity.
- Possibility of one or several SI modules (Application, profibus, coder boards).
- Adaptation to various technologies of synchronous or asynchronous SEW engines.
- Universal coder entrances.
- Standardization of SinCos & incremental coders.
- Positioning reference for cam and numerical synchronization.
- A Smartcard is adapted to the drive to save the adjustments of axle in cas of drive replacement or to start a new engine.
- Infeeds 0 to 10 Volts or 4 to 20 mA / Outfeeds (logic) and outfeets only from 0 to 10 Volts (analog).

Our guarantees

Spare parts covered by a warranty period of 12 months
Preservation of machine integrity
Certainty of ongoing OEM (Original Equipment Manufacturer) support
Compliance with applicable standards
Efficient after-sales service, spare parts, technical assistance
Installation by skilled technicians
Quality criteria acceptance

Conversion/delivery time & misc

Technical Level: L3
Machine downtime: 1 day / drive.
Delivery time: 8 weeks.
