

# Obsolescence: Secure machine availability

## Anticipate Spare Parts Shortage and Prevent downtime

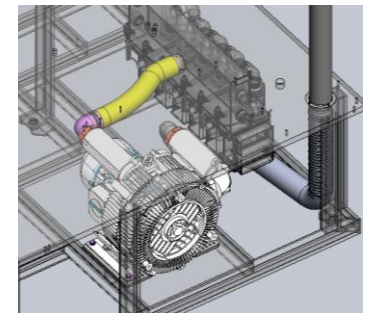

### New Gardner & Denver ELMO Vacuum Pump model

#### Value and benefits

- **Necessary solution with new pumps available in the market**  
(different dimensions, hole spacing of the connection points, different maintenance kit)
- **Prevents long downtimes in case of failure:**
  - **Vacuum Pump is the core of Rollfed labelling station: without it machine cannot work**
  - **G&D Vacuum Pumps are discontinued by manufacturer:** G&D Pumps installed on Labelling machines are out of production; they've been replaced by manufacturer by a new range products depending on Serial number
  - **Spare Part unavailability**
  - **Risk of long Downtime** for equipment at production plants as it takes an upgrade to be replaced (replacement kit to be defined, based on Pump model and Machine Serial Number)

#### Description

- New Pump models are optimized and can have different dimensions and hole spacing of the connection points, and different maintenance kit
- Replacing kit to be defined, based on Machine Serial Number and pump
- Replacement OCL includes Solution Engineering, Adaptation Kit, Hardware, Documents / BoM update.

Value: Obsolescence

Equipment: Labeler Roll 4 , Roll4 EVO, F15, F25, F35, F45, F15EVO, F25EVO, F35EVO, F45EVO (SSC, EVO DECO) Series
