

# Reduce product foaming and increase filling speed

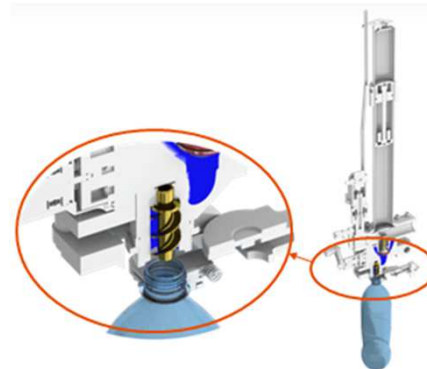

## New configuration Selecta valve with Swirler

### VALUE AND BENEFITS

- Increased filler efficiency during the filling phase
- Improvement of filling speed
- Reduction of foaming during the decompression phase

### DESCRIPTION

- The current solution with traditional valves may limit the filler speed due to foaming
- The new solution proposes filling valves with a swirler device in order to reduce product foaming during the filling phase

Value: Product Quality, Cost Optimisation  
Equipment: Fillers (Selecta C RFD)  
Catalogue code: SF030
