

Reliable dummy bottle automatic insertion

SF043 – New Automatic Dummy Bottle for Selecta Valve

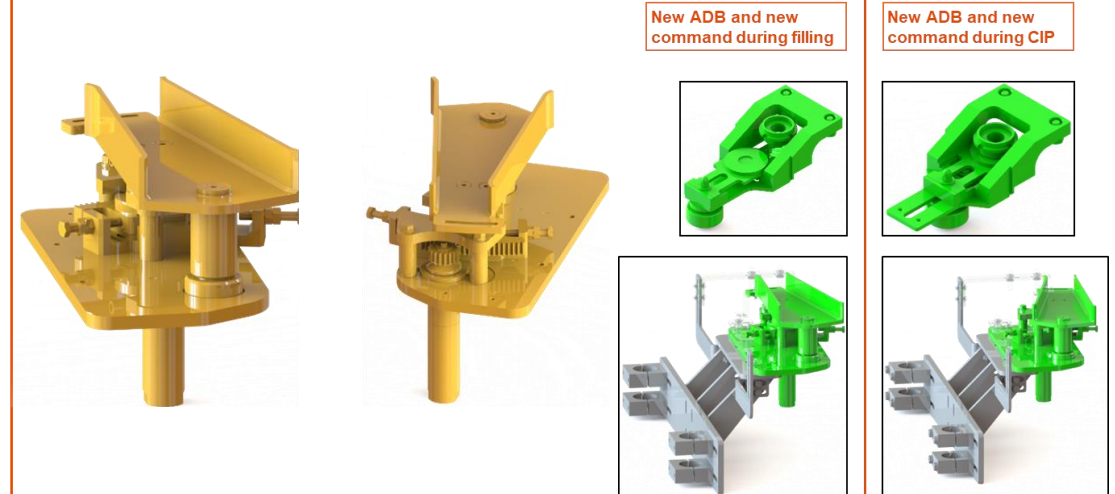

VALUE AND BENEFITS

- Improved design to eliminate stumbles and blockages (roller with increased diameter and optimized sliding surface)
- Insertion/extraction command redesigned using a completely different drive concept:
 - pneumatic motor
 - rack
 - pinion
 - adjustment screws for easier fine tuning
- Additional rinsing system to reduce the formation of limescale and sugar deposits that could limit the dummy bottle movements resulting in a failure of the CIP procedure

DESCRIPTION

- New Dummy bottle insertion/extraction cam actuated by pneumatic motor.
- Rollers and cams designed to grant less shocks and therefore more reliable system vs. previous one.
 - no more metal to metal contact
 - increased roller diameter
- Easy settings through adjusting screws.

Value: Efficiency

Equipment: Filler Selecta C_SRFD; SFB Select BV; Selecta S_SRFC
