

# Reduce maintenance costs and machine downtime

## New PAA manifold

### VALUE AND BENEFITS

- The new PAA manifold conception ensures a longer lifespan and reduces the risk of mechanical incidents caused by components possibly wearing out
- Planned maintenance every 6000 hrs (compared with current 3000 hr interval)
- Complete assembly replacement every 12000 hrs is no longer necessary

### DESCRIPTION

- The new manifold component materials have a better resistance to the PAA solution
- The rotating flange has received a new external treatment

Value: Efficiency  
Equipment: Aseptic fillers (FMa)  
Catalogue code: SP013
