

Longer life for sprayer and infeed mechanisms

New Cam for Alternative Sprayer

VALUE AND BENEFITS

- The new cam moves sprayers in both directions
- Reduced inertial effect on the mechanism
- Reduced load on infeed/outfeed units (driving the sprayers system)
- Smoother movement of sprayers

DESCRIPTION

- New driving system with cam for alternative sprayers
- A new cam is installed on the reducer
- Alternative sprayer movement is controlled by universal joints
- No need for springs
