

# Optimize extracted labels collection

## Label Press with Conveyor

### VALUE AND BENEFITS

- Savings on caustic solution consumption thanks to recovery of what usually wasted with labels extracted
- Reduced waste volume through labels' compression
- Only one point for label collection = increased operators' availability
- Increased hygiene around the machine
- Less risks of contact with caustic solution

### DESCRIPTION

- Hydraulic label press system controlled directly from the bottleswasher control panel; possibility to move the press for cleaning operations
- Main belt made of plastic material
- Caustic solution recovery System with dedicated pump, internal tank with static filter to clean the solution.
