

Screwing improvement & increase product quality

Hysteresis screwing head

VALUE AND BENEFITS

- Secure the product quality - Reduction of risk of contamination (waterproof version)
- No lubrication
- Improve greatly the torque application (excellent repeatability)
- The hysteresis technology reduces the ratcheting effect
- Head lower parts with quick release
- Gratuated setting of the top load (without tool)
- Gratuated setting of the application torque (without tool)
- Easy calibration with the Zalkin TCT (toque Calibration Tool)
- Can be adapted on the existing capper (Plug and play)

Value : Product Quality, Efficiency, safety & ergonomy
Equipment : Screw-on capper only, Non Zalkin capper
Catalogue code : Z0300

DESCRIPTION

- The existing magnetic head is replaced by a new hysteresis head
- Maintenance kit available
- Head rebuild program available by Zalkin
