Cap dedusting solution

VALUE AND BENEFITS

- Suitable for plastic, aluminum and cork caps, in various cap sizes
- Laboratory de-dusting bench test to optimize the de-dusting settings prior to production start
- Suitable for particles from 1 μ to >100 μ
- Efficiency of 99% removal of particles
- Plug and play system placed on an optional skid for easier installation

DESCRIPTION

- Complete de-dusting solution combining ionization and aspiration in key areas of the process
- Zalkin proposes a 3-step implementation:
 - Audit of the cap feeding system installed on your line
 - Laboratory test to confirm the device efficiency on your specific cap
 - Recommendations on dedusting device to be installed

Value : Product Quality
Equipment : all capper, Non Zalkin capper
Catalogue code : Z0400
